Examiner's Comment

The Examiner has considered the Applicant's arguments regarding the supplemental oath or declaration made in the Remarks section on page 2. The Applicant's arguments are not persuasive because the subject matter disclosed in the specification is not relevant. The subject matter must be originally embraced in the statement of the invention. Accordingly, the Examiner maintains the position that claims 8 and 9 present subject matter not originally claimed in the statement of the invention. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.
